

- ✓ 'Non-stick', easy-clean
- ✓ Reduce cleaning costs
- ✓ Maximise light transmission

## Maintain visibility, clarity and cleanliness!

Protect  
and enhance  
your glass  
with unique,  
award-winning  
ClearShield®  
'non-stick'  
technology!

Ordinary,  
unprotected glass

ClearShield  
Eco-Glass®

Ordinary glass is susceptible to all kinds of contamination such as dirt, construction materials, run-off, pollution, salt / hard water, tree sap and bird droppings. Effective cleaning can be difficult or even impossible.

**ClearShield Eco-Glass®** is the unique solution! Its surface is 'non-stick' and easy-clean so saves cleaning time and reduces frequency of cleaning. The glass looks cleaner for longer while maximising light transmission for better health and productivity.

Any glass can be upgraded to **ClearShield Eco-Glass®** thanks to our **ClearShield Eco-System®**, developed to renovate, protect and maintain new glass or glass already installed.

During a building's construction, glass can be exposed to harsh contaminants such as cement dust and concrete splatter. **ClearShield Eco-Glass®** can help reduce delays as these contaminants are significantly easier to remove from the surface. It is also proven to be a more cost-effective solution to replace glass that cannot be satisfactorily cleaned prior to handover.

Based on over 40 years of experience, **ClearShield Eco-Glass®** benefits architects, specifiers, contractors, building owners, facilities managers and occupants.

**Make your glass greater...
